Worst is Behind...

Highlights

- No cost overrun in 1QFY14** To recap, Daya's 4Q13 earnings swung from profit to a loss of RM15m mainly due to cost overruns at its first subsea project (Tapis EOR). Given the project is almost near completion, the cost overrun will not repeat in 1QFY14. In addition, the company has submitted some variation order claims to the customers. We are confident that the management will be able to execute Technip job well given the less complex work scope and after hard learned lesson on Tapis project.
- SD1 and SD2 are sailing well** Siem Daya 1(SD1) and Siem Daya 2 (SD2) commenced works with Technip Norge in beginning of Mar 14. Both vessels contribute US\$8-9m per month translate to \$133k-150k/vessel/day versus our assumption of US\$105k mainly due to additional services provided such as meal, bunker and communication charges.
- Bidding for short term contract to boost vessel's utilisation** We understand the company is bidding for 6 month duration contract with a big O&G client. The job will be based in West Africa with charter rate of US\$125-130k/day versus our assumption of US\$119k/day.
- Disposal of non-core asset** Recently, Daya has disposed 30% stake in its technical services for RM18m (implied PER of 6x). The buyer will have an option to buy additional 45% stake from Daya for RM32m (implied PER of 7x) in future. We are positive on the move as this is inline with management strategy to focus on O&G business going forward.
- 1QFY14 result will be weak but in black** Despite absence of cost overruns in 1Q14, both SD1 and SD2 vessel will incur loss of RM7-8m as they only started operation in Mar with fix operating cost incur in Jan and Feb. Nevertheless, overall group earnings will remain in the black. Any weakness due to the result should be a good buying opportunity.
- Margin expansion from proposed acquisition** The company is working on a fund raising exercise to raise RM930m (combination of debt and equity, Ref Fig 1) to acquire 100% of SD1 and SD2 vessels. Each vessels cost around US\$130-140m. We estimates saving of US\$15-20k/day/vessel under an ownership model (vs. lease model). Management expect the corporate and acquisition exercise to complete in July 14. A potential third vessel acquisition will increase bottom line by RM24m or 33%.
- Orderbook of RM2.2bn with tenderbook at RM800m** The company is bidding for 4 projects in subsea and 3 projects in technical services. Future growth will focus in Europe market.

Valuation

- After the corporate fund raising to acquire 100% stake in both vessels, Daya is expected to trade at 24x FY14 and 12x FY15 P/E (Ref Fig 1, Scenario1). To note, we see upside risk for FY15 due to i) higher than expected charter rate and ii) lower operating cost (our assumption of US\$70k/day vs management guidance of US\$61k/day).
